

**WP Social Press Landing Page Email Form Quick Reference Setup Guide for campaigns using both Name & Email fields. Note you can follow the video provided in the members area for a tutorial example.**

- 1- For email only forms just use the fields associated with the email section highlighted in red. This would also be the same code required for using the default autoresponder option for the pop-up.
- 2- The sections of code required to copy and paste have been highlighted in yellow text below along with an example of how each autoresponder is setup out in the theme options page.
