

Article Analyzer

User Guide

Table of contents:

1. Introduction
2. Installation steps
3. Entering the keyword to analyze
4. Analyzing the data
5. Additional functions

1. Introduction

Article Analyzer is a cool little tool to help you analyze articles for keyword density. Follow these simple instructions to begin.

2. Installation Steps

2.1 Running the installer

Double click the Article Analyzer icon to open the program.

3. Usage

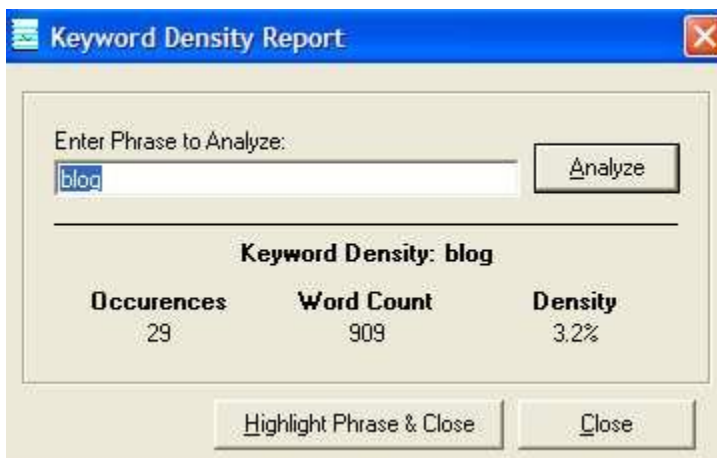

3.1 Opening/Creating an article

You can either open an existing article (in .txt format) or write/copy/paste the article in to the Article Analyzer interface.

To open an existing article go to File > Open Article.

3.2 Analyzing an article

Once your article is opened/created go to Analyze > Keyword Density Report or press Ctrl + K. Your analysis is as follows:

The screenshot shows a window titled "Keyword Density Report" with a blue title bar. Inside the window, there is a text input field labeled "Enter Phrase to Analyze:" containing the word "blog". To the right of the input field is an "Analyze" button. Below the input field, the results are displayed in a table format. The table has three columns: "Occurrences", "Word Count", and "Density". The values are 29, 909, and 3.2% respectively. At the bottom of the window, there are two buttons: "Highlight Phrase & Close" and "Close".

Keyword Density: blog		
Occurrences	Word Count	Density
29	909	3.2%

3.3 Spell Check

Article Analyzer also has a spell check feature. Go to Analyze > Spell Check or press F1.

3.4 Saving the article

Once finished go to File > Save As. You can save your article in .txt or html format.

I hope you enjoy Article Analyzer!
